Art Unit: 2857

1. Applicant cancelled claims 1-5, 14 and 17.

DETAILED ACTION

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6-13, 15 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Gotoh et al. (U.S. 7,065,471).

As per claims 6 and 12, Gotoh et al. teach an acquisition unit remote from at least one of the stationary power stations for collecting measurement data detected by sensors in the power stations (see col. 5, line 58 to col. 6, line 11 and col. 8, lines 6-19); a diagnostics unit connected to the acquisition unit for classification of operating states of the power stations that are represented by the measurement data (see Fig. 1 and col. 7, line 51 to col. 8, line 19) a memory unit connected to the acquisition unit and the local diagnostics unit and the measurement data is centrally stored in the memory unit (see col. 7, lines 28-37); and a server unit connected to the memory unit that generates machine-readable data based on an HTML language (see col. 7, lines 1-27).

As per claims 7-10, 13, 15 and 16, Gotoh et al. further teach that portions of the machine-readable data are generated while a connection is established to the server

Application/Control Number: 10/501,725

Art Unit: 2857

unit of the diagnostics system by at least one client computer via a communications link by an Internet browser installed on the client computer and the parts of the machinereadable data are requested by the client computer (see col. 7, lines 1-37).

Response to Arguments

3. Applicant's arguments with respect to claims 6-13, 15 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Contact information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohamed Charioui whose telephone number is (571) 272-2213. The examiner can normally be reached Monday through Friday, from 9 am to 6 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S Hoff can be reached on (571) 272-2216. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
